BOX III. OBSERVATIONS WHERE UNITY OF INVENTION IS LACKING

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In order for all inventions to be examined, the appropriate additional examination fees must be paid.

Group I, claim(s) 1-34 and 42-44, drawn to a packaged diaper.

Group II, claim(s) 35-41, drawn to an infant care kit.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I relates to packaged diaper whose physical dimensions are manipulated in order to improve the diaper's portability and storage capacity. Group II relates to an infant care kit comprising numerous infant accessories. Although this kit also includes a diaper, it is not specified as being the packaged diaper of Group I. Therefore, there is no direct connection between Group II and the special technical feature of Group I, which is considered to be the reduced packaged diaper.
